1. Business of the company

- **What it makes:** custom-formulated polymer compounds (127 grades): polyethylene compounds (HDPE, MDPE, LLDPE), cross-linked polyethylene (XLPE), halogen-free flame-retardant (HFFR), PVC, cable-filling and adhesive coating compounds (pp. 123, 247-248). They are used to insulate and sheath power, telecom and railway cables, and as layers of the three-layer polyethylene coating that protects oil, gas and water pipelines.
- **Who buys it:** cable makers and pipe coaters. FY26 revenue by division: wires and cables 80.93%, industrial pipelines 19.07%; by end-industry: telecom 35.10%, water 16.93%, power 14.00%, oil and gas 2.14%, others 31.83% (p. 248). Top-10 customers were 66.81% of FY26 revenue and the largest 31.74% (p. 27). Exports were 5.46% of FY26 revenue (p. 46).
- **How it earns:** manufacturing margin on compounds, plus trading of polyethylene resin. Trading ("procurement and supply" of HDPE and LLDPE resin) was Rs 41.00 cr / Rs 85.72 cr / Rs 111.32 cr FY24-26, or 13.83% / 26.10% / 31.86% of revenue (p. 33). Manufactured polymer revenue was Rs 254.42 cr / Rs 241.62 cr / Rs 237.00 cr (pp. 406, 408).
- **What it owns:** one plant at Goa on 24,220 sq m of land with eleven product-dedicated lines and 35,251 MTPA of installed capacity; capacity utilisation 75.26% for PE and 73.19% for XLPE in FY26 (pp. 123-124). Raw material (polyethylene) comes mainly from a few domestic petrochemical producers; one supplier was 71.68% of FY26 procurement (p. 39). 175 permanent employees (p. 275).
- **Approvals:** products are enlisted with a Maharatna power-transmission CPSE, a Navratna engineering CPSE and a Miniratna telecom CPSE, among others; enlistment involves product and process testing and takes years (pp. 139, 249).

Stage of the business

Classification: scaling, with a capacity expansion under way.

Evidence	Reading
Revenue Rs 296.36 cr → Rs 328.44 cr → Rs 349.43 cr (8.6% CAGR FY24-26)	Moderate growth, led by trading
Manufactured revenue Rs 254.42 cr → Rs 237.00 cr	The core business has been flat; the expansion is the step-change
Operating EBITDA margin 5.54% → 9.67% → 11.99%; Q1 FY27 14.46%	Mix and pricing improving
Capacity 35,251 → 87,301 MTPA (+148%) by FY28; utilisation ~75%	Growth depends on filling new lines
Operating cash flow positive each year; debt/equity 2.05x → 0.56x	Self-funding until now; the issue funds the next step

What the stage means: the value rests on filling a large new capacity with manufactured (higher-margin) volume rather than trading. The DCF captures that ramp-up; peer multiples price today's earnings.

2. Industry outlook

Source: CRISIL Intelligence report, **commissioned and paid for by the issuer** for this offer (p. 160).

- **Market size:** the global polymer compounding market was USD 75.5 bn in 2025 and is projected at USD 109.8 bn by 2031 (6.7% CAGR). India's market grew from USD 5.97 bn (2019) to USD 9.93 bn (2025) and is projected at USD 16.5 bn by 2031, about 9% a year (p. 179).
- **Demand drivers:** power transmission and renewable build-out (about 170 GW of solar and 47 GW of wind to be added FY26-31), power-cable market growth of about 15-16% a year in value, telecom fibre roll-out (BharatNet), the National Gas Grid, and water pipelines (pp. 160-246).
- **Structure:** a mix of multinational subsidiaries (Kingfa), large domestic compounders (DDev Plastiks, Plastiblends) and many small regional players. CPSE enlistment limits new entrants in power, telecom and pipeline applications (p. 249).
- **Cyclicality:** compounders pass through polyethylene prices with a lag; margins move with resin prices and capacity use. Export markets have raised tariffs in places (Nigeria, Algeria) (p. 51).

3. Moat and SWOT analysis

Moat

- **Approvals and qualification:** enlistment with CPSEs and utilities for cable and pipe-coating compounds is slow and costly to obtain, which protects incumbents in those segments (p. 249).
- **Product range:** 127 grades across PE, XLPE, HFFR, PVC and coating compounds let it serve a cable maker's full bill of compounds (p. 248).
- **Cost position:** a single plant with dedicated lines; scale will more than double with the expansion. Raw material is a commodity bought from a few large producers, so there is no input advantage.
- **Durability:** moderate. Approvals are a real barrier in regulated segments, but customers are concentrated and the product is specification-driven, so pricing power is limited.

STRENGTHS

- Enlisted with Maharatna, Navratna and Miniratna CPSEs for cable and pipe-coating compounds; approvals take years (pp. 139, 249)
- Operating EBITDA margin up from 5.54% to 11.99% FY24-26 and 14.46% in Q1 FY27 (p. 85)
- Cumulative operating cash flow 118% of PAT FY24-26; cash tax 24.7% of PBT (pp. 85-86)
- ROE 33.17% and ROCE 29.51% in FY26 (p. 144)
- Debt/equity down from 2.05x (FY24) to 0.56x (FY26) (p. 144)

WEAKNESSES

- Manufactured polymer revenue Rs 254.42 cr -> Rs 237.00 cr FY24-26 (pp. 406, 408)
- Resin trading 31.86% of FY26 revenue, at lower margins (p. 33)
- Top customer 31.74% and top-10 66.81% of FY26 revenue (p. 27)
- Top supplier 71.68% of raw-material procurement (p. 39)
- Single plant at Goa (p. 123)

OPPORTUNITIES

- Indian polymer compounding market USD 9.9 bn (2025) to USD 16.5 bn by 2031, ~9% CAGR (issuer-paid CRISIL report, p. 179)
- Capacity +148% to 87,301 MTPA by FY28 (p. 124)
- GCC distribution arrangement for exports to seven countries (p. 124)
- Power-cable and gas-pipeline build-out (National Gas Grid, transmission) (pp. 160-246)

THREATS

- Polyethylene price swings and dependence on a few petrochemical suppliers (p. 39)
- Execution and cost-overrun risk on a 148% capacity addition (p. 29)
- Export markets raising tariffs (Nigeria, Algeria) (p. 51)
- Larger, better-capitalised compounders (Kingfa, DDev) (p. 141)

4. Management analysis and governance

- **Promoters:** Vinod, Sushil, Madhukar, Diwakar and Karan Aggarwal, the family that also promotes BLS International Services (listed) (cover, p. 288). Karan Aggarwal (40), Chairman and MD since May 2025, has 14 years in the polymer industry; Vinod Aggarwal (72) has been a director since incorporation in 1991 (p. 290).
- **Board:** six directors: Chairman & MD, an executive director (Dinesh Sharma, with the company since 1991, head of marketing), one non-executive promoter director and three independent directors, including one woman (p. 288). Two independent directors joined in April 2025 and one in January 2026.
- **Group links to note:** independent director Manoj Joshi is also an independent director of group companies BLS International and BLS E-Services; independent director Shivani Mishra and executive director Dinesh Sharma hold directorships in other group-related companies (pp. 288-290).
- **Pay:** FY26 executive pay Rs 0.37 cr (Karan Aggarwal Rs 0.24 cr, Dinesh Sharma Rs 0.13 cr); MD basic pay capped at Rs 36 lakh a year (pp. 291-292). Pay to promoter relatives (Rs 1.81 cr) and to Vinod Aggarwal (Rs 0.53 cr) in FY24 stopped from FY25 (pp. 88-89).
- **Shareholding:** promoters and promoter group 98.53% before the issue, about 71.5% after (pp. 107, 117). Promoters' average cost Rs 2.13-14.93 a share after the 2025 bonus (p. 112). No OFS: no existing holder sells.
- **Related parties:** promoter-group trader Vinsul Makardi Limited (purchases from it Rs 32.35 cr in FY26, 9.26% of revenue; sales to it Rs 9.46 cr in FY24, nil in FY26; Rs 9.00 cr letter of comfort given in FY25, since released) and Basant India Limited (a Rs 8.97 cr loan repaid in FY25, interest of Rs 0.30 cr waived) (p. 89). The RHP notes Vinsul Makardi trades in similar products (p. 46).
- **Litigation:** no criminal, regulatory or material civil proceedings against the company or promoters; the company has filed cheque-dishonour and recovery cases, including an FIR over Rs 1.89 cr owed by a cable maker (pp. 430-435). A 2023 SEBI summons concerned trading in BLS International shares, not this company (p. 49).
- **Auditor:** Nangia & Co. LLP (peer-reviewed); no change in three years (p. 94).
- **Other:** 46 shareholders holding 3.33 lakh shares are untraceable; their bonus shares sit in a suspense account (p. 33).

Governance read. A family-run company with long-serving management, clean litigation record and an established auditor. Points to monitor: purchases from a promoter-group trader in the same business, independent directors with group directorships, and post-listing pay as profits grow.

6. Future outlook and projections

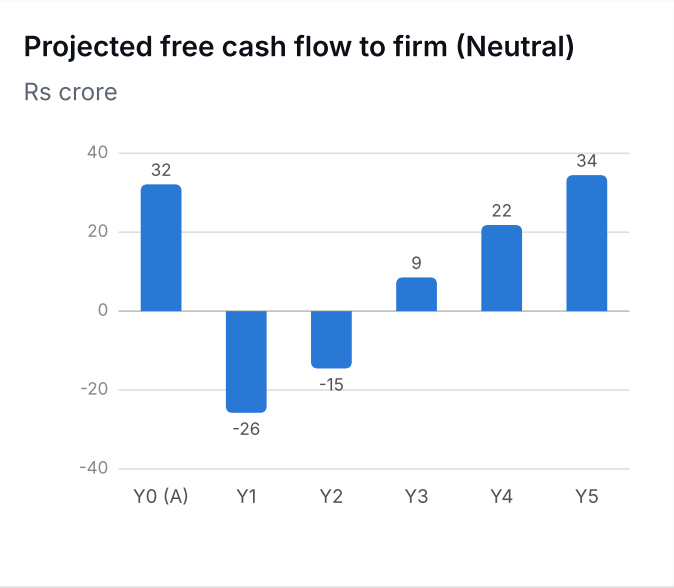

Neutral case from the valuation model; Bear and Bull are in the valuation workbook.

- **Capacity:** the expansion adds 29,192 MTPA of PE and 22,858 MTPA of XLPE (52,050 MTPA in all) at the existing Goa site, taking capacity to 87,301 MTPA; commercial production of all new lines by FY28 (p. 124). Cost Rs 77.56 cr (civil works Rs 42.93 cr, plant and machinery Rs 34.63 cr), certified by an independent chartered engineer; Rs 11.79 cr already spent (pp. 122, 124).
- **Working capital:** Rs 89.50 cr of proceeds for working capital in FY27-28 (p. 122), reducing reliance on bank lines.
- **Markets:** a new service agreement with a UAE distributor covers Egypt, the UAE, Saudi Arabia, Bahrain, Kuwait, Oman and Qatar (p. 124); domestic demand from power cables, telecom and gas pipelines (part 2).
- **What management says:** the expansion is sized for domestic demand and expected export orders, with current PE and XLPE lines near optimal utilisation (p. 124). No revenue guidance.
- **Our projections (revenue, Rs crore):**

	FY27	FY28	FY29	Driver
Bear	366.9	396.3	435.9	Slow ramp-up; trading stays a large share
Neutral	384.4	453.6	553.3	New lines filling from FY28; EBITDA margin 12.0%
Bull	401.8	502.3	653.0	Faster ramp-up plus GCC exports

What has to go right: filling 52,050 MTPA of new capacity with manufactured compounds at today's margins (12.0% operating EBITDA in FY26). **What is already in place:** land, approvals and customer base; the capex is quoted and partly spent.

BLS Polymers at Rs 150 (post-issue)	150	349.43	6.4%	13.33% (issuer KPI; 11.99% operating)	7.73%	33.17%	**34.5x**	**2.7x**
Peer median			13.2%	10.86%	6.85%	17.41%	14.5x	2.6x

Read: BLS earns a higher ROE (33.17%) and EBITDA margin (11.99% operating; peers' margins are as each reports) than the median peer, but it is a tenth of DDev Plastiks' size, has a single plant and grew more slowly in FY26. Its post-issue P/E of 34.5x is more than twice the median (14.5x) and 2.7 times DDev Plastiks (13.0x), the closest business; only Kingfa, a larger multinational subsidiary, trades higher. On P/B it is in line with the median.

DCF and fair value

Inputs (FY26, Rs crore): revenue 349.43; operating EBITDA 41.90; D&A 2.88; PAT 27.01; net worth 94.93; net debt 49.29; trade working capital 96.09 (FY25 100.89); base-year capex 4.73 (excluding expansion CWIP). Fresh issue Rs 255 cr at Rs 150 with 1.70 crore new shares; IPO capex still to spend Rs 65.77 cr in the Neutral and Bull cases.

Cost of capital (house CAPM, editable): risk-free 6.5%, beta 1.10, ERP 7.0%, size premium 2.0%, no company-specific premium; cost of equity 16.2%; pre-tax cost of debt 9.0% (RHP range 5.8-12.0%, pp. 426-427); debt weight 20%; **WACC 14.31%**; terminal growth 4.50%.

Neutral free cash flow (Rs crore):

	FY26 actual	Y1	Y2	Y3	Y4	Y5
Revenue growth	6.4%	10%	18%	22%	15%	10%
Revenue	349.43	384.37	453.56	553.34	636.34	699.98
EBITDA (12.0%)	41.90	46.12	54.43	66.40	76.36	84.00
NOPAT	29.20	32.15	37.93	46.28	53.22	58.54
Free cash flow to firm	32.14	-25.77	-14.54	8.54	21.83	34.48

Years 1-2 carry the expansion capex, funded by the issue proceeds, which are credited in the equity bridge. Terminal value is 99.0% of enterprise value (model caution: the DCF leans on the terminal year because the expansion pays back late).

Rs per share	Bear	Neutral	Bull
DCF	46.07	72.21	101.72
Relative (peer-median P/E and P/B)	90.74	90.74	90.74

Rs per share	Bear	Neutral	Bull
Fair value (50:50 blend)	**68.41**	**81.48**	**96.23**
Against Rs 150 (upper band)	-54.4%	-45.7%	-35.9%
Against Rs 142 (floor)	-51.8%	-42.6%	-32.2%

- **Scenario drivers:** growth 5-10% / 10-22% / 15-30% a year with the step-up in FY28-29; operating EBITDA margin 9.1% / 12.0% / 14.5%; working capital 33% / 29% / 27% of revenue; terminal ROIC 14% / 18% / 22%. Rationale and page cites are in the valuation workbook.
- **Sensitivity (Neutral DCF):** WACC 12.3-16.3% gives Rs 87-63; working capital 23-35% with a 10-14% margin gives Rs 56-89. Margin is the main lever.
- **Earnings quality and the relative value:** the reported P/E is a fair measure (part 5), so the relative value needs no adjustment.
- **Objects floor:** Rs 98.27 a share (Rs 167.06 cr of objects over 1.70 crore shares) is below the band but above every fair-value case.
- **Reverse DCF at Rs 150:** the price asks the business to deliver 22.5 times its current free cash flow in perpetuity; one lever at a time, it needs perpetual growth of 9.5% (vs 4.5%), or a WACC of 9.1% (vs 14.3%), or a steady-state EBIT margin of 34.7% (vs 11.2%). **In plain words: the price assumes the expansion is filled quickly and that the market will value BLS like Kingfa rather than like DDev Plastiks.**

8. Areas to watch and growth drivers

Growth drivers to track

- **Capacity ramp-up:** commissioning of the new PE and XLPE lines through FY28 and utilisation of the enlarged 87,301 MTPA plant (p. 124).
- **Mix:** share of manufactured compounds versus resin trading (31.86% of FY26 revenue) (p. 33).
- **Margins:** operating EBITDA margin holding at 12-15% (FY26 11.99%, Q1 FY27 14.46%) (p. 85).
- **Exports:** orders through the GCC distribution arrangement (p. 124).
- **End-markets:** power-cable, telecom-fibre, gas-grid and water-pipeline orders (part 2).

Points to monitor

Item	Now	Why it matters to an investor
Customer concentration	Top customer 31.74% of FY26 revenue (p. 27)	One customer moves revenue
Supplier concentration	Top supplier 71.68% of procurement (p. 39)	Supply and pricing of polyethylene
Related-party trader	Purchases from Vinsul Makardi 9.26% of revenue (p. 89)	Pricing and overlap with the group trader
Receivables	Rs 95.15 cr at Jun-26 vs Rs 72.71 cr at Mar-26 (p. 84)	Cash conversion in FY27
Board independence	Independent directors with group directorships (pp. 288-290)	Oversight of related-party dealings
Monitoring agency	Required above Rs 50 cr of fresh issue	Use of proceeds

What would change our view

- **Towards Neutral or Subscribe:** a final band materially below Rs 150 (fair value Rs 81-96); or evidence by FY28 that the new lines run above 60% utilisation at a 13%+ operating EBITDA margin, which would lift the Neutral DCF towards the Bull case.

- **Towards a firmer Avoid:** delays or cost overruns on the expansion, or the trading share rising further.
- **Price:** on today's numbers the call would be Neutral at a price between about Rs 91 and Rs 116 (where Neutral fair value is 10-30% below) and Subscribe at about Rs 90 or below.

Risks

- Polyethylene price volatility and supplier dependence (p. 39).
- Expansion delay or overrun (p. 29).
- Concentrated customers in cables and pipe coating (p. 27).
- Working capital needs as revenue grows (p. 84).
- Export-market tariffs and geopolitics (p. 51).

9. Conclusion

CALL **Avoid**

STAGE Mainboard · RHP

A profitable, cash-generative polymer compounder doubling capacity, priced at 34.5x FY26 earnings after the issue against a 14.5x peer median; our fair value is Rs 81 (Neutral) against Rs 150, because growth in the core manufactured business has been flat and the price already pays for the expansion.

Business stage Scaling (capacity expansion under way)

Avoid at Rs 150 (reported upper band).

The investment case. BLS is a 35-year-old polymer compounder with CPSE approvals in cables and pipe coating, an operating margin that rose from 5.5% to 12.0% in two years, profit that turns into cash, and a balance sheet that has deleveraged from 2.05x to 0.56x debt/equity. The issue is all fresh money and funds a 148% capacity increase at its Goa plant plus working capital. The reported P/E is a fair measure of its earnings.

Why the price is too high. The core manufactured business was flat over FY24-26 (growth came from trading resin), and the expansion will take until FY28 to commission. At Rs 150 the post-issue P/E is 34.5x, against 13.0x for DDev Plastiks and a 14.5x peer median; the price already pays for a successful expansion.

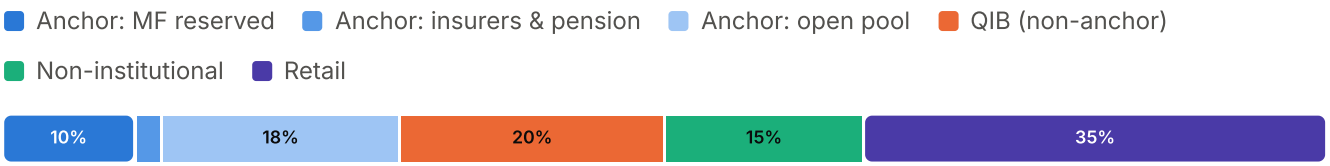

Valuation. Fair value Rs 68 / **Rs 81** / Rs 96 (Bear / Neutral / Bull), -45.7% against Rs 150 in the Neutral case. **Call rule:** the Neutral value is more than 30% below the price and the Bull value is also below it, so the call is **Avoid**, on valuation alone. No material issue was found.

Unistone Capital ownership; current prices of its past issues	Low	MCA / exchanges

Verification

- **Restated P&L reproduces:** FY26 total income Rs 354.41 cr less expenses Rs 318.43 cr = PBT Rs 35.99 cr; less tax Rs 8.98 cr = PAT Rs 27.01 cr (p. 85).
- **Balance sheet balances:** FY26 total assets Rs 206.13 cr = equity Rs 94.93 cr + liabilities Rs 111.20 cr (p. 84).
- **Cash flow:** FY26 operating, investing and financing (+38.06, -6.36, -31.05) sum to the +0.66 change in cash (p. 86).
- **EBITDA does not reproduce the KPI table:** PBT + finance cost + D&A - other income = 35.99 + 8.02 + 2.88 - 4.98 = Rs 41.90 cr for FY26, against Rs 46.60 cr in the KPI table (p. 144), which states that EBITDA is net of other income. PBT + finance cost + D&A alone is Rs 46.88 cr, close to the KPI figure, so the KPI appears to leave most other income in. The model uses our operating figure (Rs 41.90 cr).
- **Workbooks:** the toolkit verification gate passed on this build.
