1. Business of the company

- **What it does:** environmental technology for:
    - **wastewater treatment (WWT):** its proprietary C-Tech sequencing batch reactor (SBR) process plus the key equipment (decanters, diffusers, turbo blowers, fibre-disc filters, solar sludge dryers) and PLC / SCADA automation, then supervision, O&M and spares;
    - **wastewater recycling and reuse (WRR):** DuPont ultrafiltration, CCRO and MBR membranes, under an exclusive Indian distribution agreement;
    - **solid waste treatment (SWT):** integrated municipal-waste plants, now also compressed biogas (CBG). (pp. 299-300)
- **Scale:** 705 WWT installations treating 17,144 MLD at Mar-26 (724 / 17,465 MLD at Jun-26). F&S, in an issuer-paid report, puts its share of India's SBR market above 80% (pp. 188, 299).
- **Segments, FY26 (p. 501):**

Segment	Revenue	Segment result
WWT	Rs 542.76 cr (68%)	Rs 172.67 cr
SWT	Rs 140.16 cr (17%)	Rs 40.13 cr
Automation (Chavare Engineering)	Rs 106.50 cr (13%)	Rs 11.95 cr
WRR (new)	Rs 14.21 cr	Rs 9.22 cr

- **Customers:** mainly EPC contractors building municipal STPs, plus Goa Waste Management Corporation (GWMC) in SWT. Top customer 14.34% and top-10 64.44% of FY26 revenue (p. 307).
- **New lines:** two CBG plants (Tinsukia 125 TPD, Bhubaneswar 300 TPD) won by subsidiary HWTPL from a public-sector oil company, Rs 501.70 cr including 10-year O&M (p. 300). It also bought 80% of IST-Anlagenbau GmbH (Germany, solar sludge dryers) on 30-Jul-2025 for Rs 32.32 cr (pp. 312, 510).

- **Order book:** Rs 1,574.52 cr at Mar-26 (2.0x FY26 revenue) and Rs 1,570.07 cr at Jun-26, against Rs 560.39 cr a year earlier (pp. 184, 188).

Stage of the business

Classification: an established leader in its core business, scaling into new segments.

Evidence	Reading
Revenue Rs 657.50 → 697.86 → 803.63 cr (FY24-26); +15.2% in FY26	Growth back after a flat FY25
WWT revenue Rs 469.21 → 542.76 cr in FY26 (+15.7%)	The core recovered
Order book Rs 1,574.52 cr (2.0x revenue), boosted by CBG and WRR	Visibility for FY27-28
Operating EBITDA margin 29.39% / 29.73% / 29.34%	A high-margin technology business
Working capital 60% → 71% → 77% of revenue; FY26 CFO negative	Growth absorbs cash

2. Industry outlook

Industry figures come from the Frost & Sullivan report commissioned and paid for by the issuer; we have not checked them independently.

- **Sewage treatment:** India's market grew 5.4% a year over FY20-25 and is projected to grow 9.6% a year over FY25-30 (p. 173).
- **Recycling and reuse (tertiary treatment):** Rs 1,870 cr in FY26, projected to reach Rs 7,013 cr by FY31, a 30.3% CAGR (p. 173).
- **Compressed biogas:** F&S estimates CBG production at 1.7 MMTPA in FY26, which could reach 26.5 MMTPA by FY31 under the CBG blending obligation on oil marketing companies (p. 173).
- **Competition:** listed water / bio-energy players Thermax, Praj Industries and Ion Exchange (p. 186), VA Tech Wabag, and many EPC contractors. SFC's position is upstream: the technology supplier the EPC contractor specifies at tender stage.
- **Read for an investor:** demand is policy-led and long-term; the cash cycle follows municipal payment cycles through the EPC contractor.

3. Moat and SWOT analysis

Moat

- **Installed base and specification:** over 80% of India's SBR STP installations (issuer-paid F&S) means consultants and EPC contractors specify C-Tech, and each plant adds spares and O&M (p. 299).
- **Proprietary process plus in-house equipment:** C-Tech and OREX are proprietary; decanters, blowers (Turbomax JV), automation and now solar dryers (IST) are made in-house, so it earns technology and equipment margins together (pp. 299, 312). WWT segment result was 31.8% of segment revenue in FY26 (p. 501).
- **Exclusive DuPont membranes** for municipal WRR in India (p. 299).
- **Operating record in SWT:** an 8-year-old integrated MSW-to-biogas plant in Goa, which supports CBG bids (p. 300).
- **Limits:** contracts are mostly purchase orders, and payment depends on EPC contractors and municipal budgets.

STRENGTHS

- Over 80% share of India's SBR STP installations; 705 plants, 17,144 MLD at Mar-26 (issuer-paid F&S; RHP pp. 188, 299)
- Operating EBITDA margin 29.3% in FY26 (p. 188)
- Order book Rs 1,574.52 cr, 2.0x FY26 revenue (p. 188)
- WWT revenue back to growth: +15.7% in FY26 (p. 501)
- Profit taxed in cash: current tax 27% of PBT (p. 412)

WEAKNESSES

- Operating cash flow negative in FY26 and Q1 FY27 (p. 417)
- Working capital 76.5% of revenue; cash conversion cycle 242 days (pp. 188, 411)
- Net debt Rs 38.82 cr at Mar-26 after net cash a year earlier (p. 188)
- Top-10 customers 64.44% of revenue (p. 307)
- Q1 is seasonally weak: Q1 FY27 PAT Rs 1.48 cr (p. 412)

OPPORTUNITIES

- Tertiary treatment market projected at 30.3% CAGR FY26-31 (issuer-paid F&S, p. 173)
- CBG plant orders of Rs 501.70 cr with 10-year O&M (p. 300)
- DuPont membranes for municipal water reuse (p. 299)
- Solar sludge dryers via the IST-Anlagenbau acquisition (p. 312)

THREATS

- Ten pending Goa pollution-board / GWMC notices and an FIR at the SWT plants (pp. 554-556)
- EUR 5.60 m (Rs 59.75 cr) claim in Portugal (p. 556)
- Municipal payment delays via EPC contractors (p. 31)
- Technology displacement (p. 28)

4. Management analysis and governance

- **Board (eight directors, p. 367):**
  - Executive directors: Sandeep Asolkar (Chairman and MD, a director since 2005), Sarvesh Kumar Garg, S. P. Dhandoriya (SWT subsidiaries) and Prachiti Asolkar.
  - Independent directors: Neha Gada, Mulesh Savla, Amruta Patankar and Divya Momaya.
  - The board has been reconstituted since the DRHP. Chandrakant Gogri is no longer a director, and three of the four independent directors are new.
- **Executives:** CFO Amit Sawant; Company Secretary Shweta Deshpande. Prachiti Asolkar was also named Chief Strategy Officer in Aug-2025 (p. 389).
- **Ownership:** promoters 42.84% and promoter-group company Asolkar Tradecraft 5.33% before the offer (pp. 163-165). After the promoters sell 46.70 lakh shares in the OFS and the fresh issue at Rs 330, the group would hold about 41% (our computation).
- **Who is selling (cover):** the OFS is 1,56,82,750 shares.
  - Promoters: S. P. Dhandoriya 37.36 lakh; Sandeep and Priya Asolkar 9.34 lakh.
  - Other shareholders: Sarvesh Garg 35.65 lakh; Sandeep Parab, Rajesh Nambisan and Kumaraguru Madurakavi 21.36 lakh each; V. V. S. Yannamani 9.33 lakh; Jayshree Shah 0.70 lakh; Hardik Matalia 0.37 lakh.
  - Their average cost is Rs 36.72 a share (Rs 42.85 for Jayshree Shah).

- **Pay and dividends:** CMD pay Rs 4.21 cr in FY26 (p. 99). An interim dividend of Rs 3 a share (Rs 28.02 cr) was declared on 04-Sep-2026, before the IPO (p. 510).
- **Related parties:** small outside the group: purchases from Turbomax India (a JV) Rs 3.28 cr and a Rs 12.25 cr equity investment in it in FY26 (pp. 99-100).
- **Litigation and compliance (pp. 553-557):**
  - **Goa plants:** ten show-cause notices since Jul-2025 from the Goa State Pollution Control Board and GWMC to subsidiaries HWTPL (North Goa) and VWTPL (South Goa). They concern effluent discharge, leachate, waste handling and effluent parameters. Responses have been filed and all are pending. GWMC's general manager also filed an FIR in Aug-2025 over effluent from a reverse-osmosis tank. GWMC is also the SWT customer.
  - **Portugal:** Municipality of Paços de Ferreira claims EUR 5.60 m (Rs 59.75 cr, 7.4% of net worth) from SFC Umwelttechnik GmbH; defence filed Oct-2024, pending. Two former MDs of that subsidiary claim deferred pay of about EUR 0.2-0.3 m in Austria.
  - **Tax:** 14 cases against the company, Rs 3.21 cr.
- **Audit:** G B C A & Associates LLP; no qualifications (p. 403).
- **Read:** an owner-run company with an experienced founder and modest related-party dealings. The recurring Goa notices point to operational compliance at the two waste plants. They are a real watch item for the SWT business, about 17% of revenue, but on the RHP's disclosure they are not a material issue under the Fund's rules.

6. Future outlook and projections

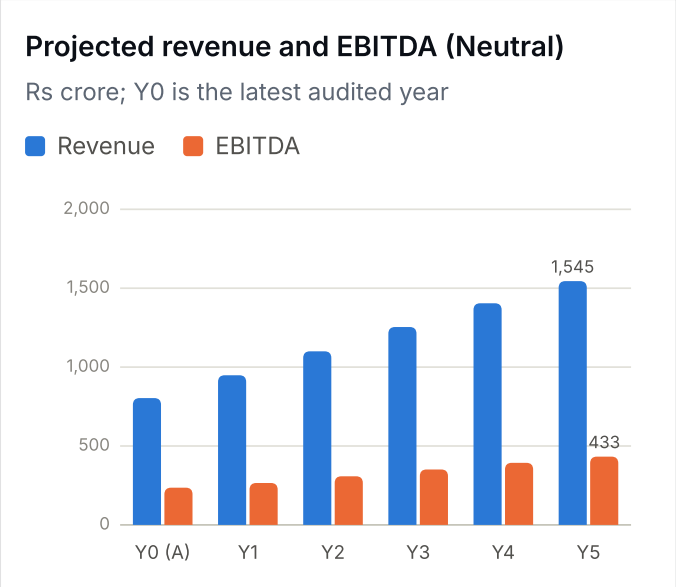

Neutral case from the valuation model; Bear and Bull are in the valuation workbook.

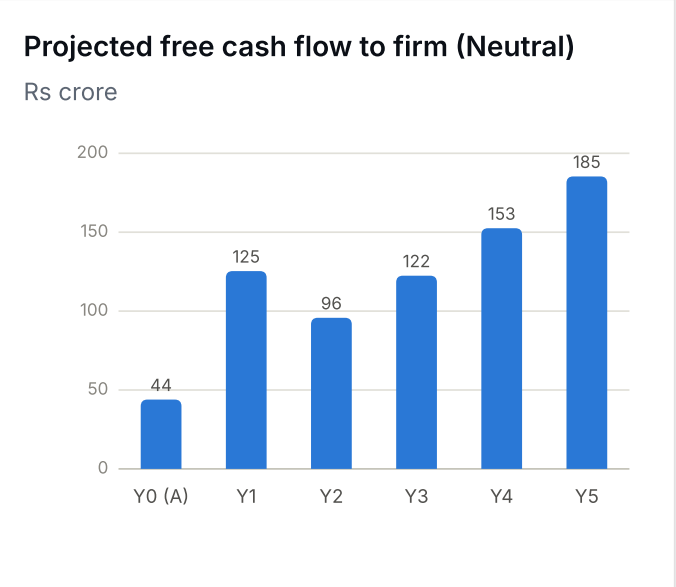

- **Visibility:** the Rs 1,574.52 cr order book covers about two years of revenue. Part of it, the CBG plants, runs over a decade because it includes 10-year O&M (pp. 188, 300).
- **Use of the issue:** Rs 42.23 cr to prepay borrowings of the company and Vasudha Waste Treatment, Rs 74.92 cr for working capital (both in FY27), balance general corporate purposes (p. 168). This should return the balance sheet to near net cash.
- **Watch:** whether collections catch up with revenue in FY27; the cash conversion cycle has been at 230-240 days for two years.

Neutral projection used in the model (Rs crore):

	FY26 actual	Y1	Y2	Y3	Y4	Y5
Revenue growth	15.2%	18%	16%	14%	12%	10%
Revenue from operations	803.63	948.28	1,100.01	1,254.01	1,404.49	1,544.94
Operating EBITDA (28%)	235.81	265.52	308.00	351.12	393.26	432.58
Free cash flow to firm	n.a.	125.3	95.7	122.4	152.5	185.3

Year 1 includes some release of working capital as the ratio moves from 76.5% to the Neutral 70% of revenue.

Peer comparison (P2P)

Peers are those in the RHP's "Basis for Offer Price" (p. 186): BSE closes on 16-Oct-2026 and FY26 consolidated figures.

Company	CMP (Rs)	Revenue FY26 (Rs cr)	EPS (Rs)	NAV (Rs)	RoNW	P/E	P/B
Thermax	3,325.75	10,694.15	63.94	492.55	13.74%	52.0x	6.8x
Praj Industries	287.00	3,167.88	1.30	71.22	1.77%	220.8x	4.0x
Ion Exchange (India)	377.20	2,914.84	12.03	91.30	11.20%	31.3x	4.1x
SFC at Rs 330 (post-issue)	330	803.63	16.52	86.23	21.25%	**20.9x**	**3.5x**
Peer median (Thermax, Ion Exchange)					12.5%	41.7x	5.4x

Read:

- SFC is much smaller than its peers but earns about twice their return on equity and a higher margin.
- At Rs 330 it is priced at 20.9x earnings, below Ion Exchange (31.3x), the closest business, and well below Thermax (52.0x).
- **Why Praj is excluded from the median:** its FY26 EPS of Rs 1.30 makes its 220.8x P/E meaningless. Including it would raise the peer median to 52.0x and lift the relative value further, so excluding it is the conservative choice.

- **P&L:** revenue 803.63; operating EBITDA 235.81; D&A 27.85; owners' PAT 154.36.
- **Balance sheet:**
  - net worth 777.47 (Jun-26, after the Rs 28.02 cr interim dividend);
  - net debt 92.48 (Jun-26 KPI net debt Rs 64.45 cr plus the dividend; leases excluded as in the KPI);
  - trade working capital 615.04 (FY25 491.78).
- **Capex:** modelled at D&A (FY26 capex Rs 16.28 cr).
- **Issue:** fresh issue Rs 150 cr credited in the equity bridge.

Cost of capital (house CAPM, editable):

- Cost of equity 16.2%: risk-free 6.5%, beta 1.10, ERP 7.0%, size premium 2.0%, no company-specific premium.
- Pre-tax cost of debt 9.0%; debt weight 20%.
- **WACC 14.31%**; terminal growth 4.50%.
- Terminal value is 72.8% of enterprise value in the Neutral case.

Rs per share	Bear	Neutral	Bull
DCF	106.07	174.27	235.39
Relative (peer-median P/E and P/B)	609.65	609.65	609.65
Fair value (50:50 blend)	**357.86**	**391.96**	**422.52**
Against Rs 330 (upper band)	+8.4%	+18.8%	+28.0%
Against Rs 313 (floor)	+14.3%	+25.2%	+35.0%

- **Scenario drivers** (Bear / Neutral / Bull; rationale and page cites are in the valuation workbook):

Driver	Bear	Neutral	Bull
Revenue growth a year	6-8%	10-18%	12-25%
Operating EBITDA margin	24%	28%	30%
Working capital (% of revenue)	80%	70%	60%
Terminal ROIC	15%	20%	25%

- **Why DCF and peers diverge (-71%):** the DCF discounts at 14.3% and charges the business for the working capital its growth needs (about 70 paise per rupee of extra revenue). That caps it near 11x FY26 earnings. Listed water and energy peers trade at 31-52x. The divergence is the finding: the band sits between the two, much closer to the cash-flow view than to peer multiples.
- **Sensitivity (Neutral DCF):**
  - WACC 12.3-16.3% gives Rs 222-143.
  - Working capital at 60% / 76.5% / 80% of revenue gives Rs 187 / 166 / 162.
- **Earnings quality and the relative value:** the reported P/E is a fair measure (part 5), so the relative value needs no adjustment.
- **Reverse DCF at Rs 330:** the price asks the business to deliver 72.3 times its current free cash flow in perpetuity. One lever at a time, it needs perpetual growth of 11.9% (vs 4.5%), or a WACC of 9.9% (vs 14.3%), or a steady-state EBITDA margin of about 47% (vs 28%). **In plain words: the price pays for some franchise value beyond today's cash flows, but stays well below what listed peers command.**

8. Areas to watch and growth drivers

Growth drivers to track

- **Order execution:** conversion of the Rs 1,570.07 cr order book (Jun-26) into revenue, especially the two CBG plants (pp. 188, 300).
- **Collections:** receivables and the cash conversion cycle (242 days in FY26) coming down after the working-capital infusion.
- **WWT momentum:** whether FY26's +15.7% continues (p. 501).
- **WRR:** growth beyond the first Rs 14.21 cr of revenue with DuPont membranes (p. 501).
- **Margins:** operating EBITDA near 28-30% as lower-margin EPC work grows.

Points to monitor

Item	Now	Why it matters to an investor
Cash conversion	FY26 CFO -Rs 25.80 cr; Q1 FY27 -Rs 21.34 cr (p. 417)	Profit must start turning into cash
Goa compliance	Ten pending SCNs and an FIR (pp. 554-556)	SWT plant operations and the GWMC relationship
Portugal claim	EUR 5.60 m pending (p. 556)	Possible outflow, 7.4% of net worth
Leverage	Net debt Rs 64.45 cr at Jun-26 (p. 188)	Should fall after the Rs 42.23 cr prepayment
OFS	78% of the issue to sellers at an average cost of Rs 36.72	Signals early holders monetising
Board	Three of four independent directors are new (p. 367)	Oversight continuity

What would change our view

- **Firmer:** FY27 operating cash flow back above PAT, receivable days falling, and CBG revenue starting.
- **Towards Neutral:** another year of negative cash flow, or an adverse order at the Goa plants that disrupts SWT revenue.
- **Price:** under the call rule the issue reads Subscribe up to about Rs 440 on these numbers, so the whole band (Rs 313-330) is inside the Subscribe zone.

Risks

- Payment delays from municipalities via EPC contractors (p. 31).
- Customer concentration and purchase-order contracts (p. 307).
- Working-capital needs of SWT and CBG projects.
- Environmental compliance at operated waste plants (pp. 554-556).
- Technology change in wastewater treatment (p. 28).

STAGE

Mainboard · RHP

India's dominant SBR sewage-treatment technology supplier (705 plants, 29.3% operating margin) priced at 20.9x FY26 earnings at Rs 330, against 31-52x for listed peers; our fair value is Rs 392 (Neutral), so Subscribe. Watch cash conversion (FY26 operating cash flow negative) and the Goa plant notices.

Business stage Established leader in its core, scaling into new segments

Subscribe at Rs 330 (upper band).

The investment case. SFC is the dominant technology supplier for SBR sewage treatment plants in India: 705 installations, a 29% operating margin, a business that grew 15% in FY26 with its core WWT segment recovering, and an order book of twice annual revenue after wins in compressed biogas and water reuse. At Rs 330 it is priced at 20.9x FY26 earnings, below every listed peer. The reported P/E is a fair measure of its earnings.

What to keep an eye on. Cash conversion is the weak spot: working capital has risen to 77% of revenue and operating cash flow was negative in FY26 and Q1 FY27. About four-fifths of the offer goes to early shareholders whose average cost is Rs 36.72. The Goa waste plants have collected ten pollution-board and customer notices since Jul-2025.

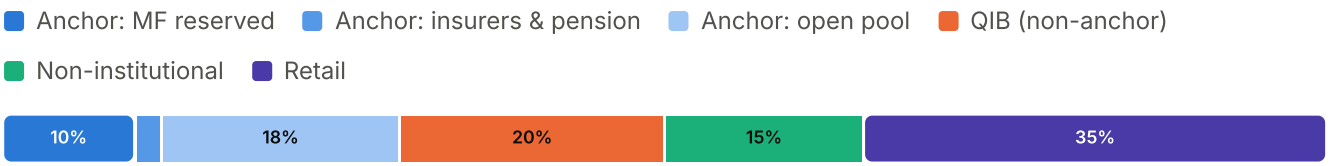

Valuation. Fair value Rs 358 / **Rs 392** / Rs 423 (Bear / Neutral / Bull). **Call rule:** at the upper band the Neutral value is 18.8% above the price, so the call is **Subscribe**. Even the Bear value (+8.4%) is above the price. No material issue was found.
