CALL

Neutral

BUSINESS STAGE

Early growth (tender-driven, lumpy)

A leading Indian thermal-imaging OEM that owns its technology, priced at 78.8x FY26 earnings against an 85.6x peer median; our Neutral fair value is Rs 515 (-26% vs Rs 700) because FY26 was a down year with cash tied up in orders, and the outcome turns on how quickly the Rs 432 cr of orders convert.

Revenue FY26 **₹363 cr** CAGR FY24-FY26: **-8.0%**	PAT FY26 **₹51 cr** CAGR FY24-FY26: **-13.8%**	EBITDA margin **28.8%** FY24: **26.2%**	Cash conversion (CFO / PAT, 3 yrs) **-63.0%**

Basis. Red Herring Prospectus dated 10-Oct-2026, a 100% book-built **offer for sale** of up to 1,21,74,046 equity shares of Rs 2 (including 14,000 for employees, Rs 65 discount), with JM Financial and IIFL Capital Services as BRLMs. Price band **Rs 665-700**; lot 21 shares (Rs 14,700 at the upper band). Anchor bidding 14-Oct-2026; bid/offer **15-Oct to 19-Oct-2026**; allotment on or about 21-Oct; listing on NSE and BSE on or about **23-Oct-2026** (p. 473; NSE issue page). Restated consolidated financials run to **30-Jun-2026** and are **111 days old** at the date of this note. FY24 is standalone because the subsidiaries were formed in FY25 (p. 245). All business figures are from the RHP; printed page numbers are cited (printed page = PDF page - 5). Subscription and anchor size are from NSE; anchor investor names are from press reports and are **unverified**.

Judged at the **upper band, Rs 700**, which is also the price at which institutions bought from CEAQ India and CEAQ Singapore on 29-30 Sep 2026 (pp. 151-152). Holding period assumed: 2-3 years. Grey market premium is not used. Written from an investor's point of view, under the Fund's standing rules: normal

1. Business of the company

- **What it sells:** electro-optic and infrared systems for defence and security: thermal weapon sights, hand-held thermal binoculars, imaging cores, targeting and fire-control systems, missile seekers and stabilised gimbal payloads (p. 246). Tactical systems (soldier-carried sights) were 58.37% of FY26 revenue (Rs 211.68 cr); platform systems (payloads for remote weapon stations, vehicles, loitering munitions, balloons) were 39.93% (Rs 144.81 cr), up from Rs 12.70 cr in FY24 (p. 248). Directed-energy systems are in development.
- **Who buys it:** in FY26 the Indian Government was 71.19% of revenue, private system integrators 24.10% and foreign governments 3.34%; in FY25 foreign governments were 57.07% (pp. 250-251). Customer names are withheld for confidentiality, as is usual in defence (p. 24).
- **How it earns:** competitive tenders with pricing fixed in advance (p. 23). Bid-win ratio 35.27% across FY24 to Q1 FY27 (97 of 275 bids) (p. 23).
- **What it owns vs outsources:** asset-light. It owns the IP and an R&D centre in Bengaluru (339 employees, 130 engineers), builds prototypes in-house and outsources volume manufacturing to EMS partners including Kaynes Technology and Avalon Technology (pp. 54, 251). Key inputs include imported infrared detectors (p. 25).
- **Selling abroad:** knocked-down kits, cores and white-labelling, so that partners' products qualify as locally made in the buyer's country (p. 232).

Stage of the business

Classification: early growth, tender-driven and lumpy.

Evidence	Reading
Revenue Rs 96.83 cr (FY23, implied) to Rs 428.19 cr in FY24, then Rs 469.08 cr and Rs 362.65 cr	Growth comes in steps as large contracts are won and delivered
EBITDA margin 26-30% in each full year	Product-level pricing power is intact
Capex Rs 39.35 cr vs D&A Rs 31.34 cr in FY26	Light physical capital needs; most D&A is amortisation of the purchased IP
Working capital 43% / 64% / 110% of revenue FY24-26	Cash is tied up while orders are executed, as is common in defence electronics (Data Patterns reports 365-432 working-capital days, p. 147)
Largest Indian supplier of thermal imaging to government (issuer-paid report)	A strong position in a small, growing niche

What the stage means: earnings and orders are the better guide to value than one year's cash flow, which swings with delivery timing. The valuation therefore uses three-year average margins and working capital in the Neutral case and blends the DCF equally with peer multiples.

2. Industry outlook

Source: "Assessment of Global and Indian Defence Electronics and Technology Industry" by Frost & Sullivan (India), **commissioned and paid for by the issuer** for this offer (p. 245).

- **Market size:** global military expenditure USD 3,362.2 bn in CY2025, projected at USD 4,410.9 bn by CY2030 (5.6% CAGR); Europe grows fastest at 7.5% (p. 161 onwards). India's EO/IR market is put at USD 522 m in CY2020 rising to USD 1.4 bn by CY2030, a 10.5% CAGR (p. 205).
- **Structure:** Indian EO/IR is led by Bharat Electronics, with Alpha Design, Paras Defence, HAL and L&T active in parts of the stack (pp. 237-240). Globally Tonbo competes with US, European and Israeli primes, whose products are often export-restricted under ITAR; Tonbo's are not (p. 246).
- **Regulation:** DAP 2020 favours "Indigenously Designed, Developed and Manufactured" (IDDM) vendors; Tonbo qualifies (p. 247).
- **Cycle:** procurement is episodic; emergency buying lifts demand in bursts (p. 21). The RHP links FY26 to export delays from the West Asia conflict and orders moving into FY27 (p. 22).
- **Peer growth in FY26:** Paras Defence +30.69%, Data Patterns +30.55%, Astra Microwave +10.62%, Zen Technologies -29.37%, BEL +16.16% (p. 146).

3. Moat and SWOT analysis

Moat

- **Technology and know-how:** owned IP in thermal cores, image processing and stabilisation, 130 R&D engineers and US patents (pp. 232, 251). The issuer's own benchmark puts its Spartan-S weapon sight at 280 g against about 800-900 g for two Indian alternatives (p. 232).
- **Qualification and track record:** field-proven systems with the Indian Army, NATO buyers and others; new entrants take years to qualify (p. 231).
- **Export freedom:** ITAR-free products can be sold where US-origin systems cannot (p. 246).
- **Policy preference:** IDDM status favours indigenous OEMs (p. 247), shared with other Indian makers.
- **Durability:** the moat is technical and in a specialised niche. Tenders are re-competed, so it is sustained by continued R&D rather than by contracts.

STRENGTHS

- 100% ownership of IP since Mar-2024 across optics, IR engines and video processing (pp. 138, 246)
- Largest supplier of thermal imaging systems to Indian government agencies Apr-24 to Mar-26; 94% of Indian thermal-imaging exports by units FY24-26 (issuer-paid F&S report, p. 246)
- 28,000+ systems deployed in 24 countries; ITAR-free portfolio (p. 246)
- Gross margin 48.6% / 56.4% / 51.1% FY24-26 (p. 144)
- Cash tax 23.3% of cumulative FY24-26 PBT; no auditor qualifications or auditor change (pp. 89, 100, 440)

WEAKNESSES

- FY26 revenue Rs 362.65 cr, down 22.69%, as export orders slipped; Q1 FY27 is seasonally small (Rs 36.01 cr) (pp. 23, 89)
- Working capital 109.7% of FY26 revenue; cumulative CFO -Rs 121.00 cr FY24-26 (pp. 87, 90)
- Top-10 customers 77.83% of FY26 revenue, typical of defence tendering (p. 24)
- Materials from related party CEAQ Singapore 26.3% of FY26 expenses (p. 94)
- Inventory Rs 319.63 cr at Jun-26 built ahead of FY27 deliveries (pp. 25, 87)

OPPORTUNITIES

- India EO/IR market $522 m (CY2020) to $1.4 bn (CY2030), 10.5% CAGR - issuer-paid F&S report (p. 205)
- Orders of Rs 118.15 cr received Jul-Sep 2026, incl. a Rs 51.44 cr export order deferred from FY26 (pp. 23, 250)
- Platform systems grew from Rs 12.70 cr (FY24) to Rs 144.81 cr (FY26) (p. 248)
- IDDM eligibility under DAP 2020 favours indigenous OEMs (p. 247)

THREATS

- Tender-based, non-recurring contracts; bid-win ratio 14.29% in Q1 FY27 vs 40.91% in FY24 (p. 23)
- Export orders exposed to conflicts and export approvals: foreign-government revenue Rs 267.69 cr → Rs 12.11 cr FY25-26 (p. 251)
- Singapore High Court suit by a CEAQ Singapore minority shareholder naming the company, MD and a nominee director (p. 448)
- Lock-in expiries: 287 lakh pre-issue shares (50% of capital) free after six months (p. 121)

4. Management analysis and governance

- **Promoters:** Arvind Kondangi Lakshmikumar (MD & CEO, with the company since 2005, M.E. BITS Pilani), Ankit Kumar (Executive Director, Chief Business and Revenue Officer, B.Tech IIIT Hyderabad) and Cecilia D'Souza (Executive Director, Chief Commercial Officer, chartered accountant). All three have run the business since the 2012 buy-out from its research parent (pp. 247, 303). Combined holding 17.43% pre-offer, 14.01% after selling 19.60 lakh shares (pp. 124-126).
- **Board:** nine directors: three executive, three nominee (CEAQ Singapore, HBL Engineering, Florintree) and three independent, with an independent chairperson, Sonal Shrivastava, a former group CFO of Vedanta (pp. 300-302). The independent directors joined on 29-Sep-2025 (p. 307).
- **Overlap to note:** nominee director Mathew Cyriac (Florintree) is also on the boards of Data Patterns (India), a listed peer, and ideaForge Technology (pp. 301-302).
- **Pay:** FY26 executive pay Rs 5.21 cr in all, 10.2% of FY26 PAT (Ankit Kumar Rs 2.81 cr, Cecilia D'Souza Rs 1.39 cr, Arvind Lakshmikumar Rs 1.00 cr). Terms from Dec-2025: MD Rs 3.08 cr fixed; Ankit Kumar Rs 1.54 cr fixed plus up to Rs 1.50 cr bonus; Cecilia D'Souza Rs 1.54 cr (pp. 304-305).
- **Team:** CFO T. S. Sivashankar (since Oct-2023; IIT Madras, IIM Lucknow, ex-Citibank and Arpwood) holds 1.05%. Employee attrition 7.71% in FY26; no KMP or senior-management attrition (pp. 51, 315).
- **Shareholders and the offer:** CEAQ Singapore 25.47% and CEAQ India 8.73% (both formerly Tonbo Imaging entities), HBL Engineering 14.25%, Florintree 5.17%, Amansa 4.25% (p. 127). CEAQ India sells its full holding and CEAQ Singapore part of its holding; promoters sell 19.60 lakh shares; HBL Engineering does not sell (cover). CEAQ Singapore makes up the 20% minimum promoter contribution, locked for 18 months (pp. 119-120). Institutional buyers including SBI Mutual Fund, HDFC Life, 360 ONE and Amansa bought at Rs 700 in September (pp. 151-152).
- **Related parties:** the IP was bought from CEAQ Singapore for Rs 183.19 cr in FY24 on a DCF valuation, which ended royalty payments; CEAQ Singapore also supplies materials (Rs 78.98 cr in FY26). Both are disclosed in full (pp. 94-95, 439).
- **Litigation:** no criminal or regulatory proceedings against the company. A minority shareholder of CEAQ Singapore has filed a suit in the Singapore High Court over the 2024 preference-share issue, naming the company, the MD and a nominee director; papers not yet served (pp. 448-451). Small GST disputes (Rs 0.83 cr) and a customs notice of 23-Jul-2026 (p. 92).
- **Auditor:** Kalyanasundaram and Associates; no change in three years; no qualifications or emphasis of matter; audit trail confirmed (pp. 100, 325, 440).

Governance read. The board is well constituted for a newly listed company: an independent chair with large-company CFO experience, three institutional nominees and clean audit reports. Points to monitor are the related-party purchases from the former parent and the board overlap with a listed peer.

Q1 is seasonally the smallest quarter: revenue recognition is concentrated in the second half (p. 144).

At the upper band (shares unchanged at 5,72,82,100): market cap Rs 4,009.75 cr; P/E 78.8x FY26 diluted EPS (Rs 8.88), 76.2x basic (Rs 9.19); P/B 7.25x (NAV Rs 96.57); EV Rs 4,087.18 cr using FY26 net debt of Rs 77.43 cr; EV/EBITDA 39.1x FY26. On the FY24-26 average PAT of Rs 64.06 cr, the P/E is 62.6x. Sources: pp. 87-90, 139-141, 144; price ratios are our computation.

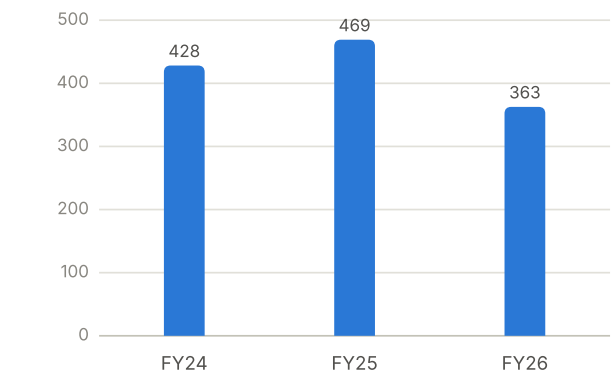

Positives and points to monitor

Positives	Points to monitor
Gross margin 51.05% and EBITDA margin 28.85% in FY26 despite lower revenue (p. 144)	FY26 revenue -22.69% as export orders moved into FY27 (pp. 23, 144)
Current tax 23.3% of cumulative PBT (p. 89)	Working capital rose to 109.7% of FY26 revenue; operating cash flow negative in FY25-26 (pp. 87, 90)
Clean audit reports, no auditor change, audit trail confirmed (pp. 100, 325, 440)	Stock built to Rs 319.63 cr at Jun-26 for FY27 orders (pp. 25, 87)
Rs 118.15 cr of orders won in July-September 2026 (p. 250)	Borrowings Rs 167.23 cr at Aug-26 to fund working capital (p. 445)
No criminal or regulatory proceedings against the company (p. 448)	Intangibles Rs 162.70 cr (29.4% of net worth), the purchased IP (p. 87)
Independent chair; institutional nominee directors (p. 300)	Promoters hold 14.56% with the promoter group after the offer (p. 124)

Working capital in context. Trade working capital was Rs 184.98 cr, Rs 300.31 cr and Rs 397.71 cr FY24-26. Revenue fell Rs 106.43 cr in FY26 while working capital rose Rs 97.39 cr, which is what a deferred delivery looks like: the stock is bought and the sale moves to the next year. The FY25 operating cash outflow also includes the final instalments of the IP purchase, which sat in other current liabilities (p. 439).

6. Future outlook and projections

Neutral case from the valuation model; Bear and Bull are in the valuation workbook.

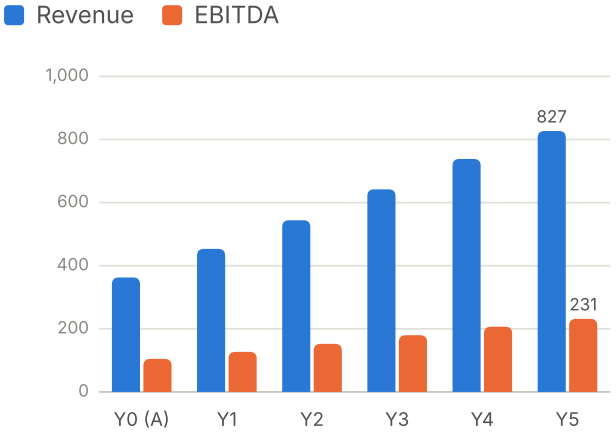

- **Contracted:** Rs 314.24 cr order book at 30-Jun-2026 (domestic Rs 231.87 cr, overseas Rs 82.37 cr; platform Rs 198.35 cr, tactical Rs 115.43 cr), plus Rs 118.15 cr received in July-September 2026 (p. 250). Together about Rs 432.39 cr, 1.19x FY26 revenue. This includes a Rs 51.44 cr export order deferred from FY26 (p. 23).
- **Capacity:** manufacturing is outsourced, so growth needs order wins and components rather than new plant.
- **New products:** platform systems and missile seekers are the growth line (Rs 12.70 cr in FY24 to Rs 144.81 cr in FY26); directed-energy systems are in development (p. 248). Five US patents granted and four applications pending (p. 232).
- **Management's view:** the RHP attributes FY26 to timing rather than loss of customers and expects the deferred export order to be delivered in FY27 (p. 23). No revenue guidance is given.
- **Three-year path (our scenarios, revenue Rs crore):**

	FY27	FY28	FY29	Driver
Bear	398.9	430.8	461.0	Slow conversion of orders
Neutral	453.3	544.0	641.9	FY27 back near the FY25 level, then steady order inflow
Bull	507.7	660.0	825.0	Full conversion of the book plus export recovery

What has to go right: delivery of the Rs 432 cr of orders on time and collection of the stock built in Q1. **What is already contracted:** about one year of FY26-level revenue.

Peer comparison (P2P)

Peers are those in the RHP's "Basis for Offer Price"; prices are BSE closes on 07-Oct-2026 and figures are FY26 (pp. 141, 146-147). EV/EBITDA for peers is not computed because the document gives no share counts or net debt.

Company	CMP (Rs)	Revenue FY26 (Rs cr)	Rev. growth FY26	EBITDA margin	PAT margin	ROE	P/E	P/B

Peer median (four included)			20.6%	34.4%	23.2%		85.6x	13.0x

Read: Tonbo is priced 8% below the peer median on P/E and at about half the peer P/B. Its EBITDA margin (28.85%) is in the peer range, and its FY25 ROE (20.20%) was above Data Patterns' FY26 level. FY26 growth and PAT margin trail the peers because of the export deferral. If FY27 revenue returns near the FY25 level, the P/E on that year falls well below the peer median. The market will judge it against peers on that recovery.

- **Scenario drivers:** year-1 growth 10% / 25% / 40%, easing to 5% / 12% / 15% by year 5; EBITDA margin 24% / 28% / 30%; working capital 90% / 70% / 50% of revenue; terminal ROIC 12% / 16% / 22%. Rationale and page cites are in the valuation workbook.
- **Why the two methods differ:** peer multiples price Tonbo's earnings the way the market prices listed defence electronics companies (Rs 924). The DCF prices free cash flow, which in this business arrives late because working capital is high while orders are executed (Rs 106). Both are shown; the blend gives them equal weight.
- **Sensitivity (Neutral DCF, Rs per share):** WACC 12.2% to 16.2% moves it from Rs 138 to Rs 85; working capital at 64% of revenue with a 30% margin gives Rs 127, and 76% with a 26% margin gives Rs 85. Working-capital intensity is the main lever.
- **Reverse DCF at Rs 700:** FY26 free cash flow was negative (-Rs 50.57 cr), so no cash-flow multiple can be stated; the price assumes cash generation improves from here. Holding today's working-capital level, the price would need a steady-state EBIT margin of about 195% against 20.2% actual, which is not a realistic path. The realistic path is working capital falling back towards FY24-25 levels as orders are delivered. In plain words: **the price assumes the business returns to its FY24-25 pattern of growth and cash conversion.**

8. Areas to watch and growth drivers

Growth drivers to track

- **Order conversion:** Rs 432 cr of orders in hand (p. 250). FY27 revenue near the FY25 level (Rs 469 cr) would bring the P/E on FY27 earnings well below the peer median.
- **Platform systems:** revenue up from Rs 12.70 cr (FY24) to Rs 144.81 cr (FY26); payloads for remote weapon stations, loitering munitions and vehicles are the largest part of the order book (Rs 198.35 cr) (pp. 248, 250).
- **Export recovery:** exports were 65.52% of revenue in FY25 and 5.57% in FY26; the Rs 51.44 cr deferred export order is the first marker (pp. 23, 144).
- **Defence procurement in India:** IDDM preference under DAP 2020 and a 10.5% CAGR projected for Indian EO/IR to CY2030 (issuer-paid report) (pp. 205, 247).
- **New products:** missile seekers and directed-energy systems (in development) (p. 248).
- **Margins:** EBITDA margin held at 26-30% in each full year; operating leverage as revenue recovers (p. 144).

Points to monitor

Item	Now	Why it matters to an investor
Order conversion	Rs 432 cr of orders vs FY26 revenue Rs 362.65 cr (p. 250)	Sets FY27 revenue and the P/E on it
Working capital and cash flow	109.7% of revenue; CFO negative in FY25-26 (pp. 87, 90)	The DCF value rises sharply as this normalises
Customer concentration	Top-10 77.83% of FY26 revenue (p. 24)	Normal for defence; a lost tender moves revenue
Related-party purchases	CEAQ Singapore 26.3% of FY26 expenses (p. 94)	Pricing and continuity of supply
Lock-in releases	About 287 lakh shares at six months (p. 121)	Supply in the share price, not in the business
Singapore suit	Not yet served (p. 448)	Low financial exposure on present facts

What would change our view

- **Towards Subscribe:** H1 FY27 revenue of Rs 180 cr or more; positive operating cash flow for H1 FY27; order book at or above Rs 400 cr at 30-Sep-2026; working capital back below 75% of revenue by March 2027. Any two of these would lift the Neutral fair value towards the price.
- **Towards Avoid:** a further deferral of the export order book, H1 FY27 revenue below Rs 120 cr, or a material governance development.
- **Price:** at a market price near Rs 515-560 the call on today's numbers would be Subscribe.

Risks

- Lumpy, tender-based revenue and the timing of export approvals (pp. 21-23).
- A few large customers in any year (p. 24).
- Imported infrared detectors and suppliers on purchase orders (p. 25).
- Working capital funded partly by short-term bank debt (p. 445).
- Share supply when lock-ins end at six and 18 months (p. 121).

9. Conclusion

CALL **Neutral**

STAGE Mainboard · RHP

A leading Indian thermal-imaging OEM that owns its technology, priced at 78.8x FY26 earnings against an 85.6x peer median; our Neutral fair value is Rs 515 (-26% vs Rs 700) because FY26 was a down year with cash tied up in orders, and the outcome turns on how quickly the Rs 432 cr of orders convert.

Business stage Early growth (tender-driven, lumpy)

Neutral at Rs 700.

The investment case. Tonbo is an Indian defence-electronics OEM that owns its technology and leads its niche.

- It owns 100% of its IP since March 2024 across optics, infrared engines and video electronics, and has 130 R&D engineers (pp. 138, 251).
- Per the issuer-paid Frost & Sullivan report it was the largest manufacturer of thermal imaging systems for Indian government and defence agencies over Apr-2024 to Mar-2026, and shipped 94% of Indian thermal-imaging exports by units FY24-26 (p. 246). Its products are ITAR-free and deployed in 24 countries.
- Profitability is steady through a weak year: EBITDA margin 26.2% / 29.7% / 28.9% FY24-26, with profit taxed in cash (current tax 23.3% of PBT) (pp. 89, 144).
- Orders in hand of about Rs 432 cr (Rs 314.24 cr at 30-Jun-2026 plus Rs 118.15 cr won in July-September) cover about 1.2 years of FY26 revenue (p. 250).

What holds the value back at this price.

- FY26 was a down year: revenue fell 22.7% to Rs 362.65 cr as export orders slipped into FY27, and cash went into stock built for those orders, so operating cash flow was negative (pp. 23, 25, 90).
- At Rs 700 the P/E is 78.8x FY26 earnings, close to the 85.6x peer median, while peers grew revenue about 21% in the same year. The price already assumes the recovery.

Valuation. Fair value Rs 486 / **Rs 515** / Rs 556 (Bear / Neutral / Bull), -26.4% against Rs 700 in the Neutral case. Peers' multiples alone give Rs 924; a cash-flow DCF gives Rs 106, because the DCF is still carrying FY26's working capital. **Call rule:** the Neutral value is between -10% and -30% of the price, so the call is **Neutral**. No material issue was found.

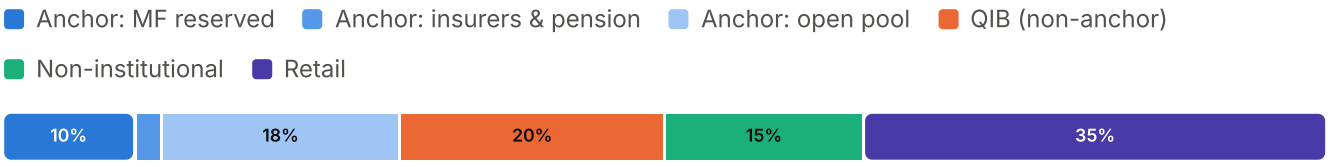

What would move it to Subscribe: H1 FY27 revenue of Rs 180 cr or more with positive operating cash flow, which would show the order book converting; or a market price nearer Rs 515-560.
