1. Business of the company

- **What it does:** a **steel processing centre**. It buys coated (colour-coated and galvanised) and hot-rolled steel coils and slits, cuts to length, shears and embosses them into slit coils and blanks for appliance and engineering manufacturers, with just-in-time delivery and inventory management for the customer (p. 239).
- **Who buys it:** OEMs and ODMs. Home and commercial appliances (air conditioners, refrigerators and similar) were 86.54% of FY26 product revenue and 89.93% in Q1 FY27 (p. 37). FY26 customers include Amber Enterprises (20.40% of revenue), Western Refrigeration (15.98%), Haier Appliances (8.70%), PG Technoplast (5.84%), Dixon (3.46%) and EPack Durable (1.76%); top-10 71.33% (p. 35).
- **Supply:** an authorised service partner of **JSW Steel Coated Products** since 2021, which supplied 86.65% of FY26 coil purchases and 85.13% in Q1 FY27 (pp. 30-31). The agreement (1-Apr-2025) carries minimum purchase commitments and inventory norms, restricts buying coated products from other mills, grants no exclusivity, and can be ended by JSW on three months' notice (pp. 31-32).
- **Plants:** four facilities on 42,209 sq m at Wada and Bhiwandi (Maharashtra), Ghiloth (Rajasthan) and Sri City (Andhra Pradesh), each placed near appliance clusters (p. 240). FY26 installed capacity 2,38,020 MT slitting and 1,84,324 MT cut-to-length, used 60.6% and 58.7%; Q1 FY27 63.8% and 59.7% (p. 132). 160 permanent employees (p. 240).
- **History:** the founder, Vijaykumar Gupta, began steel trading as Bombay Steels in 1983 and started processing at Bhiwandi in 2012; the company took over the proprietorship business in January 2021 and has since added the northern and southern plants (p. 239).

Stage of the business

Classification: scaling: new plants built, now filling capacity.

Evidence	Reading
Revenue Rs 755.26 cr → Rs 1,055.71 cr → Rs 1,266.82 cr (29.5% CAGR FY24-26)	Rapid growth from new plants
Q1 FY27 revenue Rs 397.08 cr, 25% above the FY26 quarterly average	Growth continuing into the AC season
Installed capacity up 23.8% a year FY24-26; utilisation 59-64% in the main lines (pp. 132, 240)	Room to grow without new plants
Adjusted EBITDA margin 6.51% → 7.02% → 6.80% (Q1 FY27 8.10%) (p. 131)	Thin, as usual for processors; seasonally higher in Q1
Debt/equity 4.31x → 3.33x → 2.78x → 2.00x (Jun-26) (p. 132)	Expansion was debt-funded; the issue repays debt

2. Industry outlook

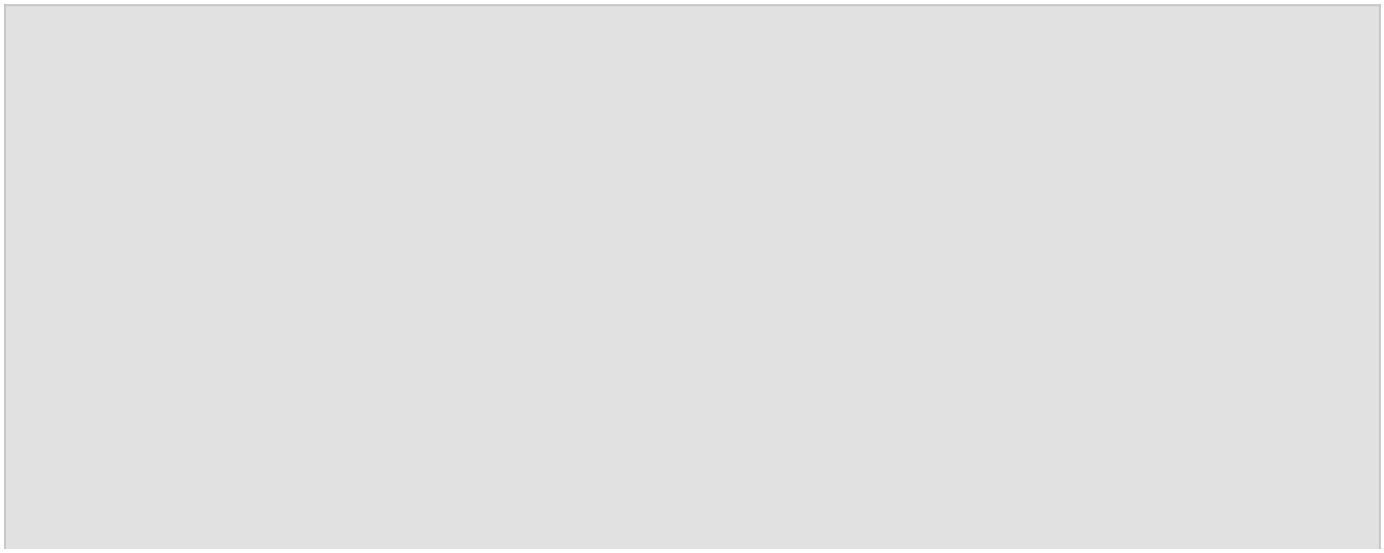

Industry figures are from the CareEdge report commissioned and paid for by the issuer (p. 239); we have not checked them independently.

- **Market:** India's steel processing centre market was about USD 8.2 bn in CY25, up from USD 5.4 bn in CY20, and is projected at USD 12.4 bn by CY30; the global market is USD 214.9 bn, growing 6.2% a year (pp. 185, 190).
- **Why processors exist:** mills sell coils in bulk; appliance and auto makers want precise sizes delivered just in time. Processors earn a conversion margin plus a logistics and inventory-carrying role, on thin margins and with working capital tied up in steel. The RHP cites capital needs, inventory, customer qualification and multi-location networks as entry barriers (p. 185).
- **Demand driver:** the shift of air-conditioner, refrigerator and component manufacturing to India under the white-goods production-linked incentive scheme, which concentrates demand around the clusters where the company's plants sit (pp. 143 onwards, 240).
- **Competition:** mill-owned service centres, other JSW service partners (JSW may appoint more in the company's regions, p. 31), independent processors (BMW Industries, Shiv Aum Steels) and coated-steel makers such as Manaksia Coated Metals (p. 130).
- **Read for an investor:** a volume business tied to appliance production and steel prices; returns come from utilisation, working-capital turns and customer stickiness rather than pricing power.

3. Moat and SWOT analysis

Moat

- **Service-partner status with JSW Steel Coated Products:** assured access to coated coils, the key input (p. 240).
- **Location next to customers:** plants beside the AC and refrigerator clusters of Amber, Western Refrigeration, PG Technoplast and EPack cut freight and lead time, and are hard to replicate quickly (p. 240).
- **Approved-vendor relationships** with large ODMs and OEMs, including Haier, Dixon and IFB (p. 240).
- **Limits:** processing is not proprietary; the JSW arrangement is non-exclusive and terminable, so the relationship that secures supply also concentrates it (p. 31).

STRENGTHS

- Plants inside appliance clusters in the West, North and South (p. 240)
- Authorised service partner of JSW Steel Coated Products since 2021 (p. 240)
- Revenue up from Rs 755.26 cr to Rs 1,266.82 cr in two years (p. 85)
- RoNW 25.12% and ROCE 16.40% in FY26 (pp. 130, 132)
- Adjusted EBITDA margin 8.10% in Q1 FY27 (p. 131)

WEAKNESSES

- PAT margin 2.41% in FY26 (p. 131)
- Debt/equity 2.78x (FY26); interest cover 2.4x on EBITDA (pp. 85, 132)
- 86.65% of coils from one supplier (p. 30)
- Appliances 86.54% of product revenue (p. 37)
- 25 delayed statutory filings (pp. 32-33)

OPPORTUNITIES

- Utilisation 59-64% in slitting and cut-to-length leaves room to grow (p. 132)
- India steel processing market USD 8.2 bn growing to USD 12.4 bn by CY30 (p. 190)
- Lower interest after Rs 125 cr debt repayment (p. 117)
- Engineering-sector blanks (p. 239)

THREATS

- Steel price volatility (p. 37)
- Appliance-sector slowdown and seasonality (p. 37)
- JSW may appoint competing service partners or terminate (p. 31)
- Customers buying from mill service centres (part 2)

4. Management analysis and governance

- **Leadership:** Vijaykumar Gupta, Chairman and Whole-time Director, 40+ years in steel; Nitin Gupta (his son), Managing Director, about 20 years in steel, who runs day-to-day operations and led the expansion into appliance OEM/ODM supply; Bhawna Gupta, Whole-time Director (pp. 286-288). CEO Shashi Rawat (with the company since 2022); COO Anish Arora (since Apr-2024, ex-Tata Steel); CFO Ashish Sonthalia (since Sep-2025; the previous CFO was re-designated Vice President); Company Secretary Sonam Gupta (pp. 303-305).
- **Board:** six directors: three promoter executives and three independent directors (Neelam Tater, Mihen Halani, Hemant Ostwal), all independents appointed on 21-Mar-2025 ahead of the IPO (pp. 286-288).
- **Ownership:** the promoters hold 97.78% before the issue (Nitin Gupta 78.22%) and about 63% after it; their average cost is Rs 1.25 to Rs 12.50 a share (pp. 105, 112). The Oct-2025 placement of 9,00,091 shares at Rs 88 brought in Moneyplant SME Fund and individuals (pp. 100, 103). Weighted average cost of all shares acquired in the last three years: Rs 2.59 (p. 113).
- **Pay:** three promoter directors drew Rs 0.66 cr in FY26; the CEO Rs 0.54 cr and the COO Rs 0.81 cr (pp. 89-92, 303). Modest for a Rs 1,267 cr revenue business.
- **Related parties:** the promoter family lends the company Rs 20.55 cr (Jun-26) at interest (Rs 3.08 cr in FY26) and rents it premises (Rs 0.52 cr in FY26) (pp. 89-92). GCP proceeds cannot be used to repay promoter or director loans (p. 118). Typical of a promoter-funded company.
- **Compliance record:** 25 statutory forms were filed late with the RoC over five years (with additional fees), and the 2021 allotment of 24.5 lakh shares to the founder for the Bombay Steels business transfer was filed under the wrong head without Form MGT-14. The adjudication application (6-Jan-2026) and a May-

2026 application to cancel the original form are pending before the RoC (pp. 32-33). Procedural and disclosed; no penalty yet.

- **Audit:** Shah Shah & Shah (peer-reviewed), no qualifications (p. 82).
- **Read:** a first-generation family business professionalising for listing: an experienced promoter team, modest pay, a strengthened second line (CEO, COO, CFO), and a board that is new. The filing lapses point to a back office that has lagged the company's growth; none is a material issue under the Fund's rules, but board oversight after listing is a point to watch.

6. Future outlook and projections

Neutral case from the valuation model; Bear and Bull are in the valuation workbook.

- **Capacity and use:** with 59-64% utilisation in the main lines, revenue can grow for some years with maintenance and debottlenecking capex only (p. 132). Capital commitments were Rs 9.83 cr at Jun-26 (p. 87).
- **Use of the issue:** Rs 125 cr repays or prepays borrowings; Rs 15.77 cr buys out equipment leased from Siemens Financial Services; the balance (up to 25% of gross proceeds) is GCP; all to be deployed in FY27, with a monitoring agency appointed (pp. 117-118). The issue is a balance-sheet repair: finance cost (Rs 35.71 cr in FY26, 41% of EBITDA) is the main lever on profit.
- **Management priorities:** deeper share with existing appliance customers, value-added embossing and engineering blanks, and a lighter debt profile (p. 239 onwards).

Neutral projection used in the model (Rs crore):

	FY26 actual	Y1	Y2	Y3	Y4	Y5
Revenue growth	20.0%	12%	10%	10%	9%	8%
Revenue	1,266.82	1,418.84	1,560.72	1,716.79	1,871.30	2,021.01

	FY26 actual	Y1	Y2	Y3	Y4	Y5
Adjusted EBITDA (7.0%)	86.09	99.32	109.25	120.18	130.99	141.47
Free cash flow to firm	-39.92	10.18	16.23	17.86	25.39	33.95

FY26 free cash flow was negative because inventory rose by Rs 73.6 cr and capex was Rs 54.80 cr; working capital is held at 18% of revenue in the projection, so cash flow follows growth.

Peer comparison (P2P)

Peers are those in the RHP's "Basis for Issue Price" (p. 130): prices are closes on 21-Oct-2026 and FY26 standalone figures. P/E uses diluted EPS.

Company	CMP (Rs)	Revenue FY26 (Rs cr)	EPS (Rs)	NAV (Rs)	RoNW	P/E	P/B
BMW Industries	51.17	664.07	3.35	35.85	10.15%	15.3x	1.4x
Manaksia Coated Metals & Industries	129.69	884.46	4.18	32.46	11.96%	31.0x	4.0x
Shiv Aum Steels	539.00	532.53	5.47	88.86	4.73%	98.5x	6.1x
Bombay Coated at Rs 82 (post-issue)	82	1,266.82	4.86	50.88	25.12%	**16.9x**	**1.6x**
Peer median					10.15%	31.0x	4.0x

Read: Bombay Coated is the largest of the four by revenue and earns the highest return on net worth (25.12% against a 10.15% median), helped by leverage. BMW Industries, the closest pure processor, trades at 15.3x, close to the issue's 16.9x; the median is set by Manaksia Coated (31.0x), a coated-steel maker, and Shiv Aum (98.5x) is an outlier. The peer set is small and wide, so the relative value should be read with care.

DCF and fair value

Inputs (FY26 P&L; Jun-26 balance sheet; Rs crore): revenue 1,266.82; adjusted EBITDA 86.09; D&A 12.60; PAT 30.54; net worth 136.62; net debt 274.64 (borrowings 273.69 + leases 13.03 - cash and bank 12.07); trade working capital 232.20 (FY25 179.49); capex 54.80. Fresh issue Rs 183.06 cr credited in the equity bridge; no IPO capex (the lease buy-out replaces lease liabilities already in net debt).

Cost of capital (house CAPM, editable): risk-free 6.5%, beta 1.10, ERP 7.0%, size premium 2.0%, no company-specific premium; cost of equity 16.2%; pre-tax cost of debt 9.0%; debt weight 20%; **WACC 14.31%**; terminal growth 4.50%. Terminal value is 84.5% of enterprise value in the Neutral case.

Rs per share (at Rs 82, 6.2824 crore shares)	Bear	Neutral	Bull
DCF	38.63	52.59	83.05
Relative (peer-median P/E and P/B)	168.31	168.31	168.31
Fair value (50:50 blend)	**103.47**	**110.45**	**125.68**
Against Rs 82 (upper band)	+26.2%	+34.7%	+53.3%
Against Rs 78 (floor)	+32.7%	+41.6%	+61.1%

- **Scenario drivers:** FY27 growth 5% / 12% / 20%, then 5% / 8-10% / 10-15% a year; adjusted EBITDA margin 6.4% / 7.0% / 8.0%; working capital 19% / 18% / 16% of revenue; terminal ROIC 13% / 16% / 19%. Rationale and page cites are in the valuation workbook.
- **Why DCF and peers diverge (-69%):** the DCF values a 7%-margin business that ties up 18% of revenue in working capital, carrying Rs 275 cr of net debt, at a 14.3% discount rate; equity is a thin slice of enterprise value, so it is very sensitive. Listed peers trade at 15-99x earnings. The divergence is the finding: on cash flows alone the business is worth less than the price, while the market pays far more for listed steel processors.
- **Sensitivity (Neutral DCF, at Rs 82):** WACC 12.3-16.3% gives Rs 74-38; margin 6-8% gives Rs 36-69 (at 18% working capital); working capital 15-21% of revenue gives Rs 60-45. Margin is the biggest lever because of the leverage.
- **Earnings quality and the relative value:** the reported P/E is a fair measure (part 5), so the relative value needs no adjustment. The pro-forma interest saving is not added to the model's earnings.
- **Reverse DCF:** FY26 free cash flow was negative, so no multiple can be stated; the price assumes cash generation improves. To justify Rs 82 on the DCF alone needs a steady-state EBIT margin of about 8.4% against 5.8% now.

8. Areas to watch and growth drivers

Growth drivers to track

- **Utilisation:** slitting and cut-to-length moving from about 60% towards 70-75% (p. 132).
- **Margin:** adjusted EBITDA holding near 7.5-8% across the year, not only in the AC season (p. 131).
- **Deleveraging:** finance cost falling after the Rs 125 cr repayment; interest cover above 4x.
- **Working capital:** inventory back below 15% of revenue after the FY26 build (pp. 84, 132).
- **Customer base:** new appliance and engineering wins beyond Amber and Western Refrigeration (together 36.38% of FY26 revenue) (p. 35).

Points to monitor

Item	Now	Why it matters to an investor
Supplier dependence	JSW Steel Coated Products 86.65% of FY26 coils; terminable on notice (pp. 30-32)	The service-partner terms decide supply and margin
Sector dependence	Appliances 86.54% of product revenue (p. 37)	AC season and appliance cycle drive volumes
Customer concentration	Amber 20.40%; top-10 71.33% of FY26 revenue (p. 35)	Loss of one customer moves revenue materially
Subsidy income	Rs 6.39 cr in FY24, Rs 1.65 cr in FY26 (p. 375)	Scheme tenure affects reported profit
Compliance	RoC adjudication pending (pp. 32-33)	Back-office discipline after listing

Item	Now	Why it matters to an investor
Promoter loans	Rs 20.55 cr at interest (pp. 89-92)	Whether they are repaid or stay after listing

What would change our view

- **Firmer:** FY27 results showing margins near 8% for the full year and operating cash flow above PAT.
- **Weaker:** any change in the JSW Steel Coated Products arrangement; a weak appliance season; valuing the issue on the closest peer (BMW Industries, 15.3x) alone, which would bring the blend to about Rs 62, 25% below the price (Neutral under the rule).
- **Price:** the rule reads Subscribe up to about Rs 123 and Neutral up to about Rs 158, so the whole band is well inside Subscribe.

Risks

- Steel price volatility and inventory losses (p. 37).
- Supplier and customer concentration (pp. 30-31, 35).
- Appliance-sector slowdown and seasonality (p. 37).
- Working-capital needs as growth continues (p. 86).
- Regulatory action on past filing lapses (pp. 32-33).

STAGE Mainboard · RHP

A four-plant steel processor feeding India's AC and refrigerator makers (FY26 revenue Rs 1,267 cr, up 20%; PAT Rs 30.5 cr), raising Rs 183 cr of fresh money mainly to repay debt, priced at 16.9x FY26 earnings after the issue (13.2x pro forma for lower interest), below the Rs 88 paid by investors in Oct-2025; fair value Rs 110 (Neutral) against Rs 82.

Business stage Scaling (new plants built; filling capacity)

Subscribe at Rs 82 (upper band).

The investment case. Bombay Coated is a four-plant steel processor embedded in India's air-conditioner and refrigerator supply chain, with JSW Steel Coated Products as its coil partner and Amber, Western Refrigeration, Haier, PG Technoplast and Dixon as customers. Revenue grew 29.5% a year over FY24-26 to Rs 1,267 cr, Q1 FY27 was the strongest quarter yet (margin 8.1%, PAT Rs 15.1 cr), and plants run at about 60% of capacity, so volume can grow without heavy capex. The issue is all fresh money and mostly repays debt, which should lift reported profit by about a quarter through lower interest. The reported P/E is a fair measure of its earnings.

What holds the value down. Thin margins (2.4% PAT), leverage before the issue (2.8x debt/equity at FY26), dependence on one supplier and one end-market, and weak cash conversion in a growth year (CFO 67% of PAT over three years). The filing lapses and a newly constituted board are governance points to follow, not material issues.

Valuation. At Rs 82, fair value is Rs 103 / **Rs 110** / Rs 126 (Bear / Neutral / Bull), +34.7% in the Neutral case. **Call rule:** the Neutral value is above the price, so the call is **Subscribe**. The band is below the Rs 88 at which outside investors bought in Oct-2025, and values the company at 16.9x FY26 earnings after the issue (13.2x pro forma

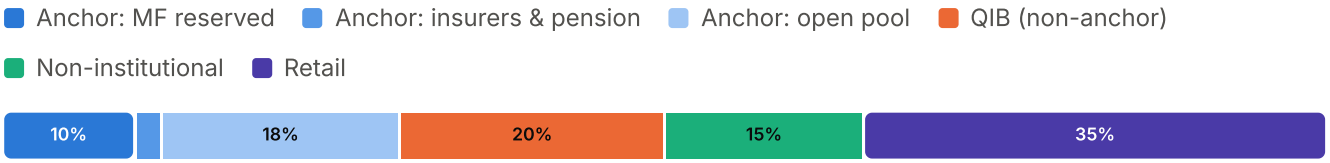

for lower interest) and 7.0x EV/EBITDA. The caution: the relative value leans on a wide peer set (15-99x) while the DCF alone (Rs 53) is below the price; on the closest peer alone the call would be Neutral.
