> Judged at the **upper band, Rs 158**. Holding period assumed: 2-3 years. Grey market premium is not used. Written from an investor's point of view under the Fund's standing rules. Depth: **SME snapshot** (the nine parts, shorter).

1. Business of the company

- **What it does:** manufactures **aftermarket components for underwater pelletizing and extrusion systems**, the machines polymer plants use to cut molten plastic into pellets. Products include die plates, cutting blades, blade holders and driving bushes. It also refurbishes and re-engineers this equipment (company website).
- **Plant:** one factory at Waghodia GIDC, Vadodara, Gujarat, with CNC, VMC, EDM, wire-cut and furnace equipment.
- **Customers:** polymer and petrochemical producers. The company says it supplies clients in more than 50 countries. Customer concentration and the export share are not available without the RHP.
- **History:** incorporated on 13-Sep-2022 as a private company and since converted to a public company. The promoters say they have more than two decades of collective experience with underwater pelletizing systems. Promoter names, and whether an earlier business was transferred into the company, are not available without the RHP.

Stage of the business

Classification: early scaling.

Evidence	Reading
Total income Rs 10.87 cr (FY24) → Rs 22.59 cr (FY25) → Rs 30.76 cr (FY26); Rs 12.25 cr in 4M FY27	Fast growth from a small base in a young company
EBITDA margin 51.58% (FY26), 36.11% (4M FY27)	Very high but already falling
Total assets Rs 47.55 cr (Mar-26); borrowings Rs 16.73 cr	Profit and debt reinvested in plant and working capital
Issue funds Rs 18 cr of machinery and lab equipment and a Rs 6.5 cr building	The next leg of capacity comes from the IPO

2. Industry outlook

- **Demand:** every polymer plant that runs underwater pelletizers needs die plates, blades and holders replaced regularly. Demand follows the installed base and plant utilisation rather than new capacity alone, so it is more recurring than the capex cycle.

- **Structure:** the original equipment makers (mostly European and US) dominate spares. Independent aftermarket suppliers compete on price, lead time and refurbishment.
- **Read for an investor:** a real niche with recurring demand and room for a low-cost Indian supplier. The risks are that it is small, technical and exposed to OEMs defending their spare-parts margins.

3. Moat and SWOT analysis

Moat

- **Technical know-how:** die plates and blades are precision, wear-critical parts, and the promoters' experience with pelletizing systems is the core asset.
- **Cost:** an Indian cost base against OEM spare-parts pricing.
- **Limits:** a young company with one plant. Whether it has qualified with large customers on repeat contracts is not visible without the RHP.

STRENGTHS	WEAKNESSES
• Niche aftermarket parts (die plates, blades, holders) for underwater pelletizers • FY26 RoNW 47.7%, ROCE 38.5% • Exports to 50+ countries (company) • In-house CNC, VMC, EDM, wire-cut and furnace capability	• Short history (incorporated 2022) • Revenue only Rs 31 cr • Margins volatile: 52% to 36% • Single plant at Waghodia GIDC
OPPORTUNITIES	**THREATS**
• Installed base of pelletizing lines in polymer plants worldwide • Refurbishment and re-engineering services • New machinery and lab funded by the issue	• OEMs defending their spare-parts business • Polymer capex cycle • Customer concentration (not disclosed)

4. Management analysis and governance

- **Promoters and board:** names, pay and holdings are not available without the RHP. The company secretary is Krati Gupta (company website). As a fresh-issue-only offer, it dilutes existing holders by about 26.6% (36.48 lakh new shares on about 100.5 lakh existing).
- **Related parties and history:** the company is three years old. The RHP will show whether it took over an earlier promoter business or depends on related-party purchases or sales, which matters for a 50% margin.
- **Read:** no governance issue is visible in the data available, but for a business this young the open checks (related parties, history, litigation) carry more weight than usual.

Is the reported P/E right? Earnings quality at Rs 158

Reported P/E is a fair measure: the adjustments found move FY26 PAT by +0.0%, within the 10% threshold. On the FY24-FY26 average, which smooths one-year items, the P/E is 26.8x reported and 26.8x adjusted.

6. Future outlook and projections

Neutral case from the valuation model; Bear and Bull are in the valuation workbook.

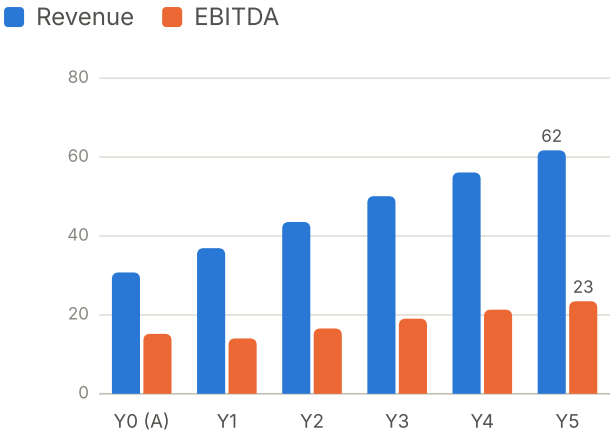

- **Use of the issue (Rs 57.64 cr):**
  - Machinery, laboratory equipment and utilities Rs 18.00 cr.
  - Office building and manufacturing facility Rs 6.50 cr.
  - Debt repayment Rs 4.30 cr.
  - Working capital Rs 14.00 cr.
  - The balance goes to GCP and issue expenses.
  - The DRHP-stage split differed (building Rs 5.5 cr, debt Rs 8 cr, working capital Rs 12 cr). The RHP figures above come from one tracker.
- **Neutral projection used in the model (Rs crore):**

	FY26 (actual)	Y1	Y2	Y3	Y4	Y5
Revenue growth	36%	20%	18%	15%	12%	10%
Revenue	30.76	36.91	43.56	50.09	56.10	61.71

Free cash flow to firm	5.6	-7.9	-1.8	9.8	11.7	13.4

Y1 is close to the 4M FY27 run-rate (Rs 36.75 cr of income and Rs 12.87 cr of EBITDA annualised). Free cash flow is negative in Y1-Y2 while the issue-funded machinery and building are built.

Peer comparison (P2P)

The trackers cite two listed engineering companies. Their CMPs are derived from the quoted EPS and P/E.

Company	EPS (Rs)	RoNW	P/E	Used?
Omnitech Engineering	6.42	11.28%	99.0x	No

Company	EPS (Rs)	RoNW	P/E	Used?
Sunita Tools	10.53	10.80%	100.7x	No
Maxwell at Rs 158 (post-issue, FY26)	8.66	47.70%	**18.25x**	

Read: neither is a close peer. Both trade near 100x earnings on returns of about 11%, a multiple that reflects listing premia rather than earnings, and the figures come from a single unchecked table. Applying 100x would value Maxwell at over Rs 800 a share, which is not a serious estimate. **We therefore use no relative value.** Under the model's rule, fair value then rests on the DCF alone. This is a real limitation: a fair peer set (Indian precision-component exporters) would probably support more than the DCF.

DCF and fair value

Inputs (FY26; Rs crore):

- Reported: total income 30.76; EBITDA 15.19; PAT 11.86; net worth 24.87; net debt taken as gross borrowings 16.73 (cash not disclosed, none credited).
- **Estimates, not reported:**
  - D&A Rs 0.8 cr and organic capex Rs 2.0 cr. Capacity growth is funded by the IPO capex object, so it is not counted twice.
  - Working capital Rs 12 cr (39% of revenue; FY25 Rs 8 cr).
- The fresh issue is credited net of 6% assumed expenses (Rs 54.18 cr). IPO capex is Rs 24.50 cr, spent 60% in Y1 and 40% in Y2.

Cost of capital (house CAPM):

- Risk-free 6.5%, beta 1.10, ERP 7.0%, size premium 2.0%; cost of equity 16.2%.
- Pre-tax cost of debt 9.5%; debt weight 20%.
- **WACC 14.38%**; terminal growth 4.50%; terminal ROIC 22%.
- Terminal value is 85% of enterprise value.

Rs per share	Bear	Neutral	Bull
DCF	50.67	87.39	127.97
Relative	n.a.	n.a.	n.a.
Fair value (DCF only)	**50.67**	**87.39**	**127.97**
Against Rs 158 (upper band)	-67.9%	-44.7%	-19.0%
Against Rs 150 (floor)	-66.2%	-41.7%	-14.7%

- **Scenario drivers:**
  - Growth 6-8% / 10-20% / 12-30% a year.
  - EBITDA margin 30% / 38% / 45%.
  - Working capital 42% / 38% / 34% of revenue.
  - Terminal ROIC 18% / 22% / 28%.
- **Sensitivity (Neutral DCF):**
  - WACC 12.4-16.4% gives Rs 107-74.
  - At 38% working capital, margin 36-40% gives Rs 83-92.
  - The discount rate and the margin path matter more than working capital.
- **Objects floor:** Rs 125 a share (Rs 42.80 cr of objects over 36.48 lakh shares, after expenses). It sits above the DCF value but below the band. The objects are mostly machinery and working capital, which

keep their value.

- **Reverse DCF at Rs 158:** the price asks the business to deliver 32.1 times its current free cash flow, in perpetuity. **In plain words: the price assumes margins hold well above 40% and growth stays above 20% for several years.**

8. Areas to watch and growth drivers

Growth drivers to track

- **Margin:** whether H2 FY27 margins recover towards FY26 levels or settle near 36%.
- **New capacity:** commissioning of the Rs 18 cr of machinery and the new building.
- **Customers:** repeat orders from large polymer producers and the export share.
- **Cash flow:** operating cash flow in line with profit.

Points to monitor

Item	Now	Why it matters to an investor
Margin durability	52% (FY26) → 36% (4M FY27)	Decides the earnings base
Track record	Incorporated Sep-2022	Little history to judge
RHP details	History, customers, RPTs, cash flow	Not yet read
Valuation support	No usable listed peer	Fair value rests on the DCF
Liquidity	SME platform, 1,600-share minimum	Exit depends on market-maker depth

What would change our view

- **Towards Neutral:** a price at or below about Rs 128 (the Bull value), or RHP figures showing the margin dip is seasonal and cash flow tracks profit.
- **Towards Subscribe:** a credible listed peer set supporting a multiple near 20x, together with stable margins.
- **Further towards Avoid:** related-party dependence or customer concentration revealed in the RHP.

Risks

- Margin compression and price competition from OEMs.
- Customer and end-market (polymer) concentration.
- Short operating history and execution of the expansion.
- SME liquidity and the 1,600-share minimum lot.

9. Conclusion

STAGE

SME · RHP

A two-year-old Vadodara maker of aftermarket parts for polymer pelletizers with a 52% FY26 EBITDA margin (36% in the latest four months), raising Rs 58 cr of fresh money at 18x FY26 and 24x annualised current earnings; our fair value is Rs 87 (Avoid) because the margin is already falling and there is no listed peer to support a higher multiple.

Business stage

Early scaling (incorporated Sep-2022; revenue Rs 31 cr; issue funds new machinery and building)

Avoid at Rs 158 (upper band).

The investment case. A niche Vadodara engineer making wear parts for the pelletizers used in polymer plants worldwide. It has grown fast, earns very high returns (FY26 RoNW 48%), and is raising Rs 58 cr of fresh money to add machinery, a building and working capital.

What holds the value down.

- The company is three years old.
- Its 52% FY26 margin has already fallen to 36% in the latest four months, which lifts the P/E from 18x to about 24x.
- There is no usable listed peer, so the value rests on cash flows, and those stay thin while the expansion is funded.

Valuation. Fair value Rs 51 / **Rs 87** / Rs 128 (Bear / Neutral / Bull), DCF only.

Call rule. The Neutral value is 44.7% below the upper band and the Bull value is also below it, so the call is **Avoid**. This is a valuation call. No governance or accounting issue was found in the data available.

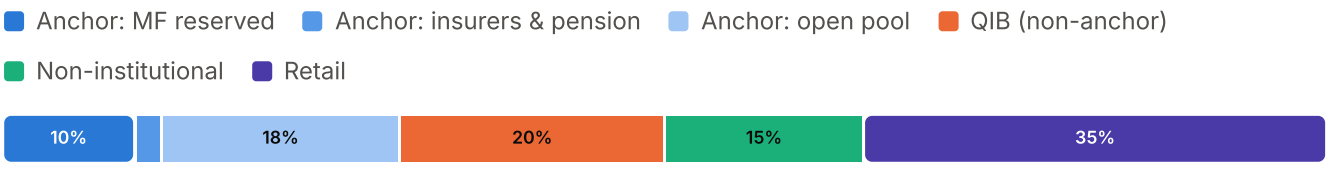

This is a **provisional** report built without the RHP. A better peer set or RHP detail on margins could move it to Neutral.

Verification

- **Share count reconciles:**
  - PAT Rs 11.86 cr / EPS Rs 11.80 = 1.005 crore shares.
  - Net worth Rs 24.87 cr / NAV Rs 24.74 = 1.005 crore shares.
  - Post-issue P/E 18.25x = (1.005 + 0.3648) crore shares x Rs 158 / PAT.
- **Issue size reconciles:** 36,48,000 shares x Rs 158 = Rs 57.64 cr.
- **Period figures agree** across HDFC Sky, Chittorgarh and unp.me for income, PAT and borrowings. FY24-26 net worth is from one tracker; the Jul-26 net worth (Rs 27.92 cr) agrees with Mar-26 net worth plus 4M PAT.
- **Workbooks:** the toolkit verification gate passed on this build.
